Database

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                           TISSUE SPECIFICITY: Highly expressed in tun
but not in normal endothelial cells.
DOWAIN: Binding to PA seems to be effected
SIMILARITY: Belongs to the ATR family.
SIMILARITY: Contains 1 VWFA domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      FUNCTION: Cellular role is not yet known.
SUBUNIT: Binds to the protective antigen (PA) of Bacillus anthracis. Binding does not occur in the presence of calcisuBCELLULAR LOCATION: Type I membrane protein (Probable).
